Engineer-geologist-hydrogeologist,
Kuban State University, Krasnodar, Russia.
Geological Faculty: Hydrogeology and
engineering geology

PROFESSIONAL SKILLS

- In my current job, I participate in writing reports, projects and studies in the field of geology and hydrogeology. I make maps and analyze data using the QGIS application. In field work, I supervise the drilling process of exploratory geological wells, perform geological reconnaissance of the terrain as well as hydrodynamic testing of wells.
- I have passed the professional exam for performing projects and studies and conducting geological research.
- Working in my previous job positions I had conducting engineering geological research in the far north of Russia: geomorphological description of the area, field description of the soil, selection and packaging of water and soil samples, thermometric testing, static penetration sounding; office processing of field material: processing of data obtained by laboratory testing, writing reports, making maps, profiles.
- I have experience in working with different programs such as:
 - MS Office, Adobe Illustrator
 - QGIS, AutoCad, Geolog, GeoDraw, GeoGS, CredoGeo, Corel Draw
 - Databases – MySQL; programming languages - Java, JavaScript; text format - XML, JSON; technologies - HTML5, CSS3;
 - In my free time I'm studying Python programming language.

LANGUAGES

- Russian – Native Speaker
- English – Upper Intermediate (Certificate of completed program of professional development in English language, ATC School, Bray, Ireland)
- Serbian –Fluent

ABOUT ME

In my previous workplaces I have proved to be an extremely capable person for quick adaptation to new working conditions and environment, work in different weather conditions with various types of people. Adding to my profession another area of knowledge - programming, I proved that I learn and upskill quickly and that I am able to master all the necessary technology and apps related to work in a short period of time. I have the experience of leading a group of people when working in the field, and I am also good in individual work. I am demanding to myself, committed to achieve goals, responsible and serious.
